TITLE INDEX

	Page
Applications of mathematical modelling to the simulation of multicomponent adsorption in activated carbon columns—by M. Balzli, A. I. Liapis and D. W. T. Rippin	145
Aspects of two-phase frictional pressure drop in tubes—by J. Kubie and H. S. Oates	205
Backmixing characteristics of a bubble column with vertically suspended tubes—by Y. T. Shah, C. A. Ratway and H. G. McIlvried	107
Behaviour of aggregates in stirred vessels—by D. T. Tomi and D. F. Bagster	1 & 9
Conversion of a CSTR to multistage operation—by R. J. Litchfield	67
Degradation of polyester-glass laminates by hot water: some experimental data—by G. Pritchard, G. Swampillai and N. Taneja	96
Drop size and extraction efficiency measurements in a pilot plant rotating disc contactor—by R. H. Chartres and W. J. Korchinsky	91
Dynamic behaviour and relative mass transfer coefficients of a porous adsorbent through exchange adsorption—by L. Szirmay	101
Dynamic response of a continuous thickener to overloading and underloading—by M. V. Maljian and J. A. Howell	56
Effect of a cool central gas feed on temperatures and velocities in an induction plasma torch—by B. Waldie and R. Hancock	178
Effect of the feed rate on the active acceleration of overflow centrifuges—by K. Zeitsch	281
Expansion of bubbling fluidised beds—by A. M. Xavier, D. A. Lewis and J. F. Davidson	274
Flooding conditions in a deep-layer liquid/liquid settler—by E. Barnea	73
Flow in an annulus of non-uniform gap—by N. C. G. Markatos, R. Sala and D. B. Spalding	28
Flow visualisation and residence times studies in a spray drier—by A. O. Ade-John and G. V. Jeffreys	36
Heat transfer coefficients for turbulent filmwise condensation—by M. D. Razavi and A. S. Damle	81
Heat transfer to fermentation systems in an air-lift fermenter—by N. Blakebrough, W. J. McManamey and K. R. Tart	127
Heat transfer to viscous Newtonian liquids in laminar flow in straight horizontal circular tubes—by D. R. Oliver and S. S. Rao	62
Hydrodynamic characteristics of a plate heat exchanger channel—by A. F. Price and A-F. M-A. Fattah	217
Influence of viscosity on axial mixing in trickle flow in packed beds—by B. A. Buffham and M. N. Rathor	266
Information flow in modular flowsheeting systems—by S. R. Metcalfe and J. D. Perkins	210
Interparticle percolation: equipment development and mean percolation velocities—by J. Bridgwater, M. H. Cooke and A. M. Scott	157
Mass transfer from large diameter vibrating cylinders—by P. F. Y. Wong, N. W. M. Ko and P. C. Yip	214
Mixing and performance in heterogeneous chemical reactors—by C. N. Collinge and M. A. Doheim	69
New method to predict hold-up and pressure drop in packed columns—by G. G. Bemer and G. A. J. Kalis	200
Numerical integration of the differential equations describing the formation of and flow in compressible filter cakes—by R. J. Wakeman	258
On-line optimal control of catalytic reactors: a simplified approach—by M. L. Brisk and G. W. Barton	113
Optimal design of chemical plant to meet time-varying demands in the presence of technical and commercial uncertainty—by W. R. Johns, G. Marketos and D. W. T. Rippin	249
Phase inversion of stirred liquid/liquid dispersions under mass transfer conditions—by S. I. Clarke and H. Sawistowski	50
Physical mechanisms of dust collection in a cyclone—by J. Abrahamson, C. G. Martin and K. K. Wong	168
Power consumption in a reciprocating plate extraction column—by M. M. Hafez and M. H. I. Baird	229
Prediction of a dividing line between conduction and convection effects in regenerator design—by P. J. Heggs and K. J. Carpenter	86
Process engineering calculations with equations of state—by I. Coward, S. E. Gale and D. R. Webb	19
Relative importance of viscous dissipation and pressure stress effects on laminar free convection—by A. Brown	77
Removal of fine particulates from gases in fluidised beds—by Y. Doganoglu, V. Jog, K. Thambimuthu and R. Clift	239
Slotted distillation trays: momentum transfer from a single slot—by M. J. Lockett and M. S. Uddin	194
Solid/liquid mass transfer in two-phase co-current upward flow in packed beds—by I. Colquhoun-Lee and J. B. Stepanek	136
Thermodynamic consistency tests: some limitations in their application—by J. D. Jenkins and M. Gibson-Robinson	43
Transport of solids through flighted rotating drums—by P. G. Glikin	120
Width of the meta-stable zone—by A. H. Janse and E. J. de Jong	187
